THE TURNER & SEYMOUR MANUFACTURING COMPANY
TORRINGTON, CONNECTICUT

ONLY BLUE WHIRL BALL BEARING BEATERS HAVE ALL THESE FEATURES

- **MOLDED PLASTIC HANDLES**

  Made of beautiful molded Plastic in green or red—will not crack or chip. Easy to grasp.

- **FULL BALL BEARING DRIVE**

  The crank revolves on ball bearings. Spins easily.

- **STAINLESS STEEL WINGS and WIRES**

  The eight wings and pivot wire are of stainless steel—easy to clean—always bright.

- **STAINLESS STEEL STATIONARY WINGS**

  An additional stationary wing of stainless steel quickens beating.

- **GEAR SHIELD**

  The shield guards the user.

- **FLATTENED CENTER WIRE**

  Enables the beater to work close to the bottom of the bowl and in small quantities.

No. 55

MEDIUM SIZE

This is the most popular style for household use. Packed individually and supplied with green or red Plastic handles.

Length, 12 inches
Weight of one dozen, 12 lbs.

No. 60

LARGE SIZE

For mixing large quantities—beating thick batters—hotel or restaurant use. Packed individually and supplied with green or red Plastic handles.

Length, 12¾ inches
Large floats
Weight of one dozen, 15 lbs.

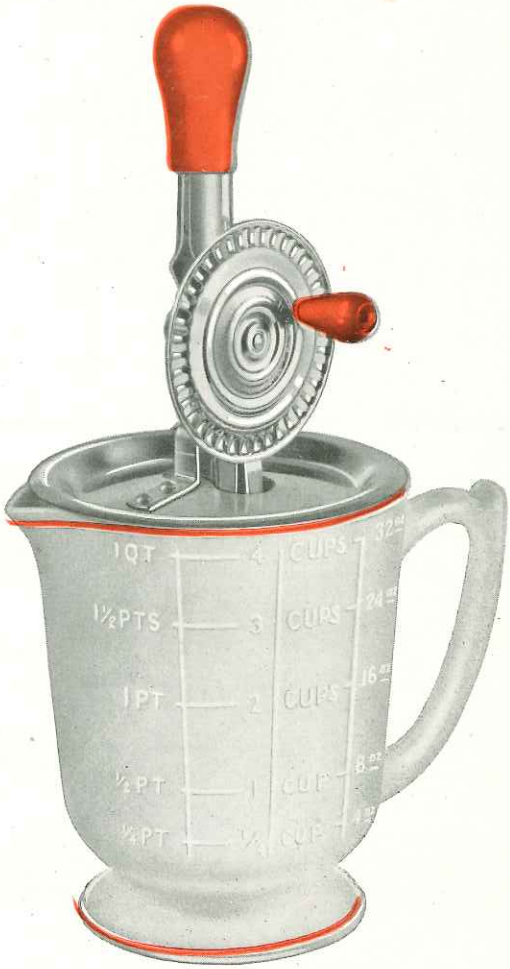
NON-SPATTER
Beater and Pitcher

No. 4

The eight beating wings and other parts of beater which touch the food are made of tinned steel. Beater handles are colored red or green to match the striping on the white glass pitcher. This is a very practical and useful beater set for the home.

Length of beater 11¼".
Pitcher 32 oz. capacity.
Packed 2 dozen Beaters to a carton. Weight 22 lbs. Packed 2 dozen Pitchers to a carton Weight 50 lbs.



1948

IS OUR

100th Anniversary

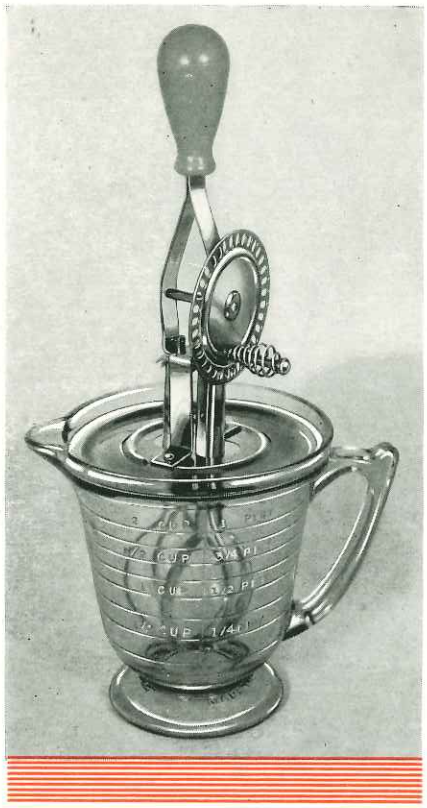
NON-SPATTER BEATERS AND PITCHERS

No. 3B

No. 3B Non-Spatter Beater supplied with quart size graduated pitcher in crystal glass. The handles of the Beater are lacquered to harmonize with the pitcher.

The Beater has eight blades of tinned steel; other metal parts, including the cover, are nickel-plated, and the cover fits securely on the rim of the pitcher.

No. 3B—Non-Spatter Beater and Pitcher.
Length of Beater, 11½ inches. Pitcher capacity, 1 quart.
Packed, 2 dozen Beaters and covers to carton.
Weight, 22 lbs.
Packed, 2 dozen Pitchers to carton.
Weight, 47 lbs.



No. 99

The Handimaid Pitcher of green glass supplied with this combination is especially made from our own mold. You will find it an unusual value for such an inexpensive combination. It is of crystal glass, graduated—has lip, handle and base, as well as a small ledge inside the rim of the pitcher on which the cover rests. This Pitcher cannot be obtained elsewhere.

No. 99—Non-Spatter Beater and Handimaid Pitcher.
Length, 11½ inches. Pitcher capacity, 1 pint.
Packed, 2 dozen Beaters and covers to carton.
Weight, 12 lbs.
2 dozen Handimaid Pitchers to carton.
Weight, 35 lbs.

No. 98

A new Non-Spatter Beater and Pitcher Combination. The Pitcher, which is made of crystal glass, has a capacity of 32 ounces. This Pitcher is exclusive with The Turner and Seymour Mfg. Co. Inside the Pitcher, just below the rim, there is a ledge upon which the cover of the beater firmly rests. The Beater has eight blades of tinned steel. The other parts are nickel-plated, including cover.

No. 98—Non-Spatter Beater and Pitcher.
Length of Beater, 11½ inches. Pitcher capacity, 32 ounces.
Packed, 2 dozen Beaters and covers to carton.
Weight, 19 lbs.
Packed, 2 dozen Pitchers to carton.
Weight, 52 lbs.

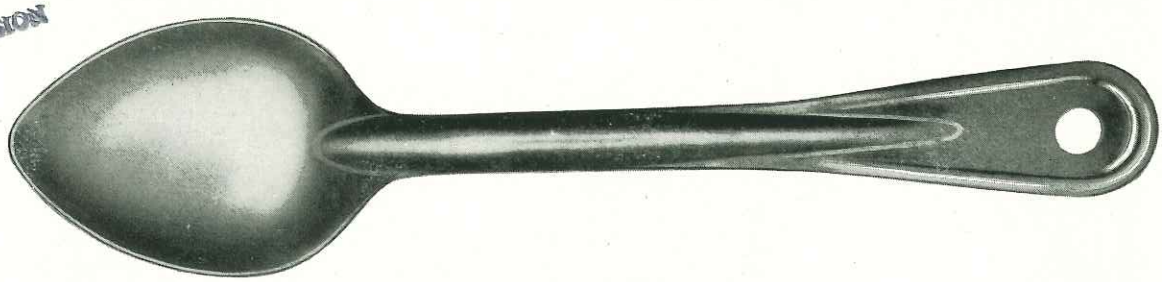
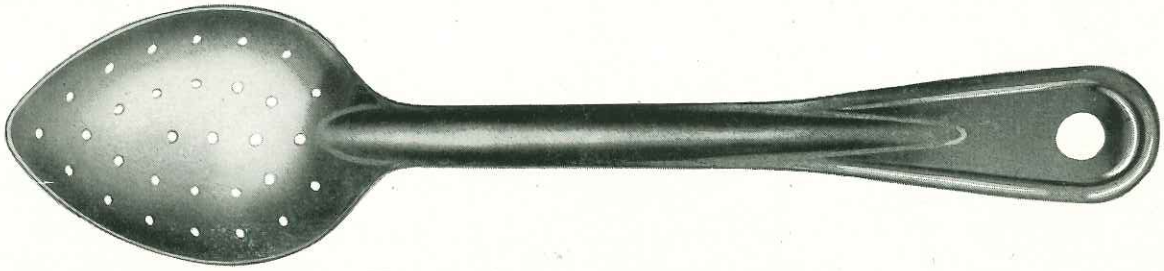
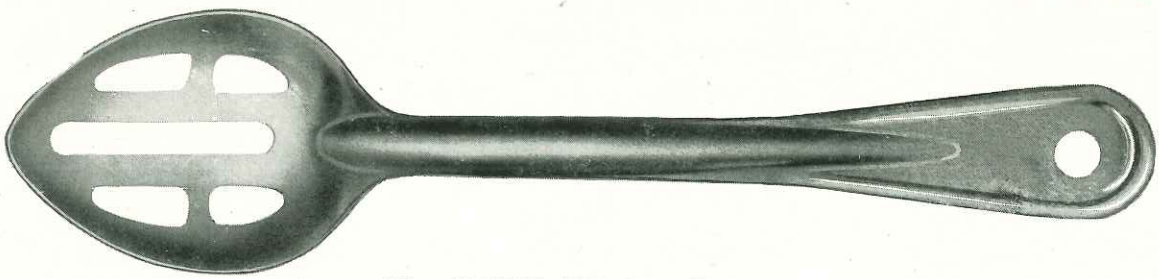
STAINLESS STEEL BASTING SPOON



No. 1320 Basting Spoon



No. 1321 Draining Spoon



No. 1322 Mixing Spoon

Nos. 1320, 1321, 1322—Stainless Steel Spoons are 13″ in length. The shape of the bowl, the well proportioned handle, the two combined at proper elevations, produce a spoon which allows the user to get a bowl full, if desired, even when working around hot kettles or roasting pans. From rigid material, substantially constructed, we have produced an ideal spoon. The stainless steel that we use is made by a reliable steel mill and is backed by our guarantee for satisfactory service.

Nos. 320, 321, 322 are identical to the above, except they are 11″ in length.

No. 1320 Series

Length, 13 inches overall.
Packed, ½ dozen to box.
Weight, 2 lbs.

No. 320 Series

Length, 11 inches overall.
Packed, ½ dozen to box.
Weight, 1½ lbs.

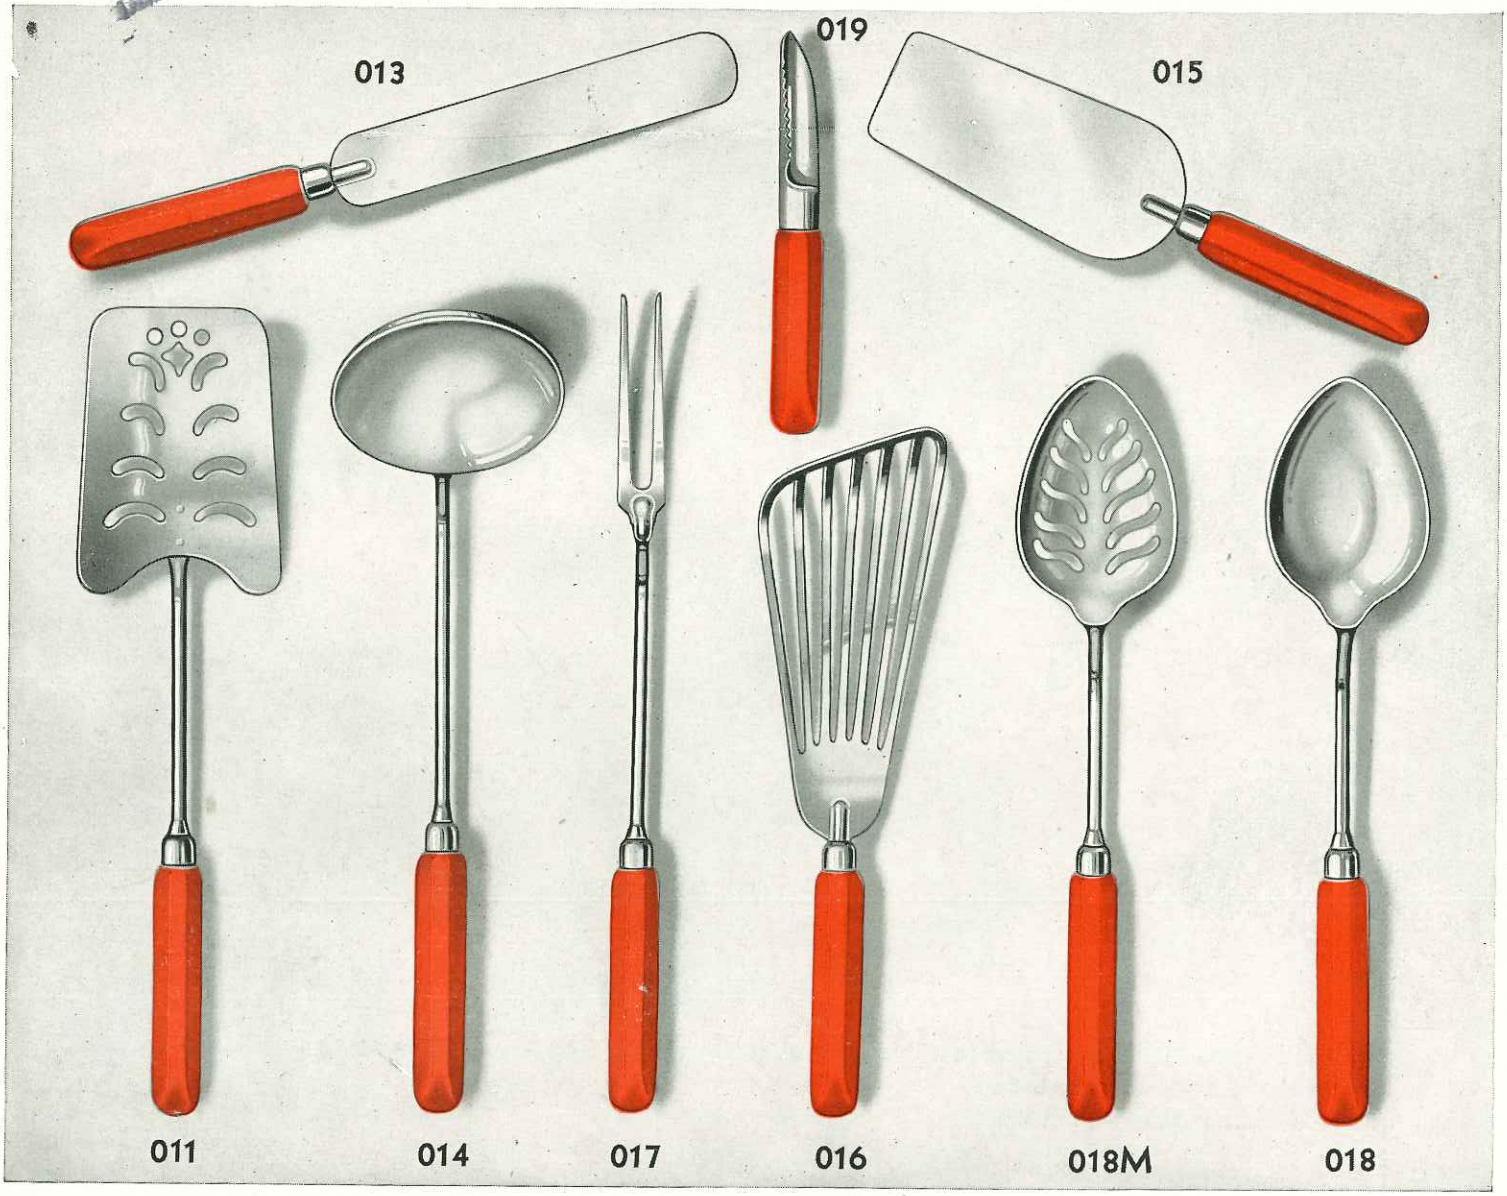
STAINLESS STEEL KITCHEN TOOLS



We are proud to add to the already well-known Blue Line Kitchen Tools nine more items, all of which are illustrated on this page.

All metallic parts of these tools are made of Stainless Steel, which will not tarnish or show stain. Each individual piece is scientifically designed so as to serve its intended purpose most efficiently.

The plastic handles are most attractively designed, not primarily for eye appeal, however, but for comfort and easy grip. Each item may be obtained in an attractive shade of green or red.

Stainless Steel is unquestionably the most practical of materials for kitchen tools and, in view of their excellent utility value, readily find a definite place in the modern kitchen. Our items are popularly priced and we are stocked to give prompt service.

★

The New Deluxe Quality

HURRICANE
can master

Here's the welcome new Hurricane can opener by Turner & Seymour. Hurricane is welcome because it is a *quality* can opener that is built to perform with the best, yet *moderately* priced to reach that vast market of small restaurants, cafeterias, diners, clubs, etc. Hurricane was conceived in the pre-war era but was postponed by necessity to a post war debut. Hurricane is simple in construction, and positive in its fast clean-cutting action. One demonstration is quickly convincing that Hurricane is far superior to any can opener at anywhere near the price. Compare Hurricane features and you will quickly realize that here is a can opener that fills a big gap in a big market.

WESTCO NO. 65

WITH CHROMIUM PLATED DIE CAST FRAME

PATENT OFFICE
AUG 10 1949
DESIGN DIVISION

RETURN TO
DESIGN DIV.

FEATURE CHROMIUM PLATED DIE CAST FRAME

Sells Better BECAUSE

PATENT OFFICE
AUG 10 1949
DESIGN DIVISI

1. Handsome in appearance.
2. Operates with exceptional ease.
3. Shearing action cuts out tops of round or oblong cans without leaving metal particles.
4. Lasts for years!

Made Better . . .

1. Die cast frame.
2. Uniquely designed, precision manufactured.
3. Plated frame, colored handle.
4. Rotating cutter must turn as it is geared with handle which you turn. Co-ordinated Roll and Cutter require no knurled wheel to turn can.

FASTER • STRONGER

Faster because it is easy to turn due to long handle. Stronger because it grips can securely and cuts as fast as you turn.

THE NEW WESTCO CAN OPENER

The Finest Can Opener Ever Made

1. Only Can Opener made equipped with 4 needle bearings for easy operation.
2. Rotating cutter and drive wheel are co-ordinated through gears with the crank handle.
3. Shear cuts top without metal particles in food.
4. Opens No. 10 Cans down to sardine can.

Model 15 • WESTCO CAN OPENER

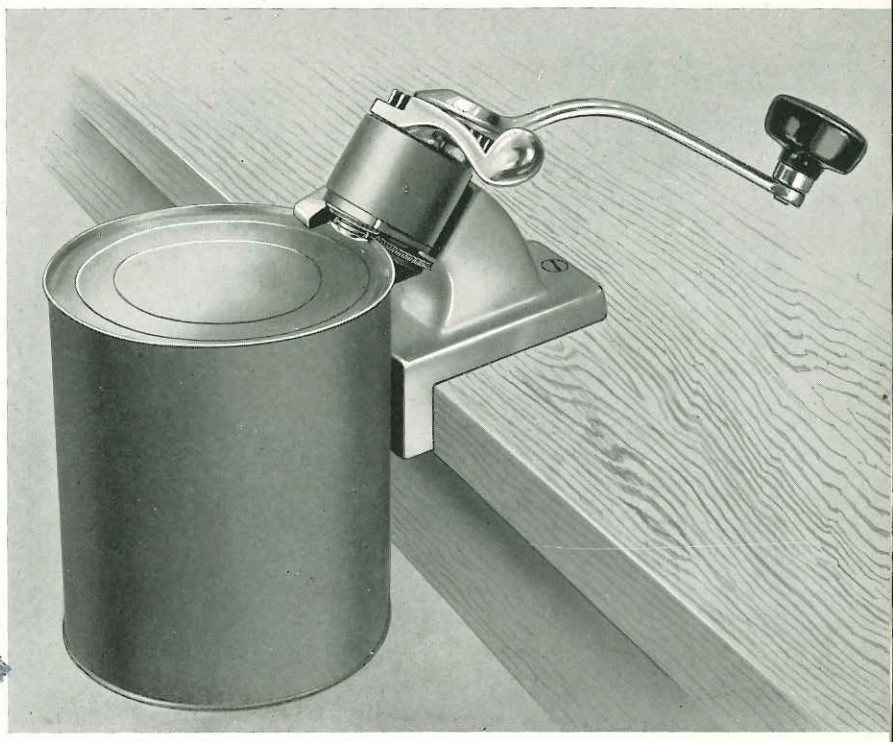
The Needle Bearing, as illustrated, is 2¼ times actual size. Virtually eliminates friction. Makes for easier operation; increases life of can opener. By the use of Needle Bearings, an exclusive Super Kan Master feature, friction is eliminated, and fast, finger-tip operation is assured. All models are equipped with four Needle Bearings—two on the cutter shaft and two on the drive wheel shaft. The drive wheel on all models obtains its traction under the rim of the can and operates in coordination with the cutting wheel so that the top is cut off by a shearing operation, which eliminates serrated edges and effectively prevents metal particles from falling into the can. The rotating knife does not come in contact with the food in the can. Cutting unit and drive wheel on all models are made of special high carbon tool steel.

THE WEST

Model 25

Illustrated to the right. Opens cans up to and including Size 12, including sardine cans. Fastened to edge of table or bench by means of die cast table bracket and three screws.

Individually packed.
Weight, 4 lbs. 4 oz.



PATENT OFFICE
AUG 10 1945
DESIGN DIVISION

SUPER KAN MASTER

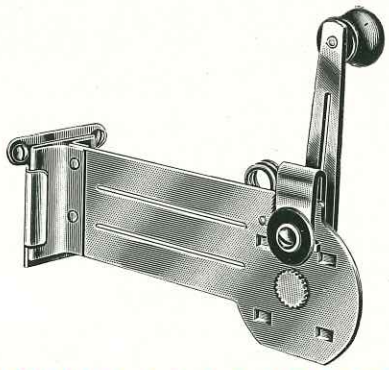
Model 35

Illustrated to the right. Opens cans up to and including Size 12, including sardine cans. Formed-metal table plate holds can in place and it may be adjusted to the height of the can by sliding up or down on the sliding bar, which in turn is held in place by a cam-action clamp. Kan Master fastened to table by thumb screw.

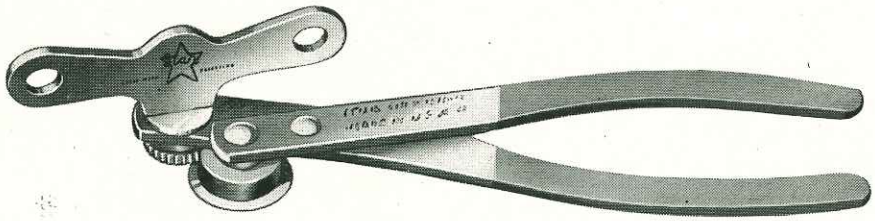
Individually packed.
Weight, 10 lbs.

THE WALL-TYPE CAN OPENER THAT BEATS 'EM ALL

Kan Master



Star Can Opener



PATENT OFFICE AUG 10 1949 DESIGN DIVISION

Star Can Openers are now manufactured with nickel-plated finish.

No. 110—Star Can Opener—Nickel-Plated.
Packed individually, then 1 dozen to carton.
Weight, 4⅛ lbs. Length, 7¾ inches.

No. 105 Neverslip

Sturdily made with lacquered handle is this combined Can and Bottle Opener. The blade is of tempered steel.

See page 13 for two-color designed handle, under No. 1105.

Length, 6⅝ inches.
Packed, 1 dozen to carton.
Weight, 1½ lbs.

No. 100 King

This all-metal Can Opener combines bottle opener and cork screw with can opener. It is nickel-plated, frame is spot welded, and blade is of tempered steel. Each dozen is packed in open display carton.

Length, 5½ inches.
Packed, 1 dozen to display carton.
Weight, 1¼ lbs.

BLUE STREAK CAN OPENERS

for hotels • restaurants • institutions

PATENT OFFICE
AUG 10 1949
DESIGN DIVISION

No. 130

Hotel or Restaurant Style

This sturdy machine is for use anywhere that large quantities of cans are opened. It becomes a permanent kitchen tool when fastened to a convenient bench or shelf.

Parts are interchangeable, easy to clean—while the blade itself is of chrome vanadium steel. Machines of this type have actually opened as many as 15,000 cans without a change of blade.

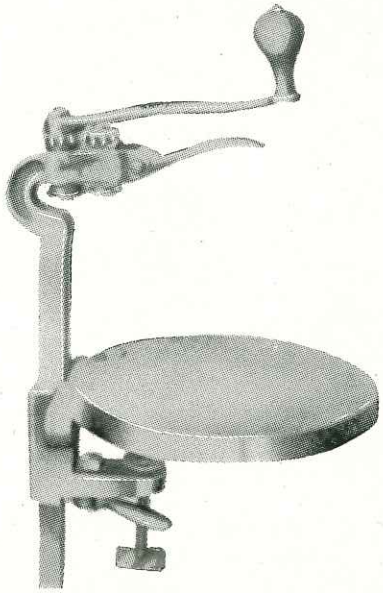
Packed individually. Weight, 2¾ lbs.

No. 136

With the hinged head one adjustment on the slide bar takes care of all cans of the same size. If a dozen gallon cans are to be opened the head is just tilted back for removing the opened can and another quickly inserted. When cans of another size are to be opened—just a change of the adjustment and you are ready.

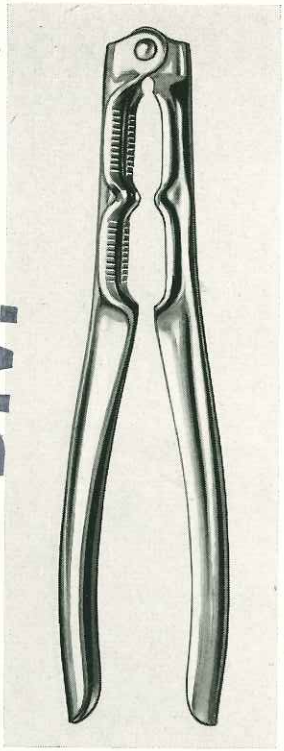
The Blue Streak is safe and simple—it saves time—cuts the can top completely off so the contents slide out fresh as when canned.

Weight in carton, 8 lbs.



RETURN TO DESIGN DIV.

PATENT OFFICE AUG 10 1949 DESIGN DIVISION



No. 395 Nut Cracker

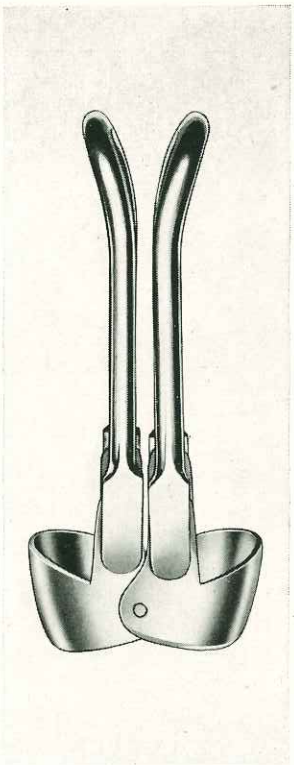
It's really a Nut Cracker—but equally good for lobster claws.
This Nut Cracker is simplicity itself, sturdily made and nickel-plated.

Length, 6 inches.
Packed, 1 dozen to carton.
Weight, 3 lbs.

No. 400 Potato Masher

"This is the best Potato Masher I have ever used," is the opinion of every woman trying this.
The Masher is an aluminum alloy casting, the rod of tinned steel, while the handle is lacquered.
This Masher may be obtained in a two-color designed handle as illustrated on page 13, listed under No. 1400.

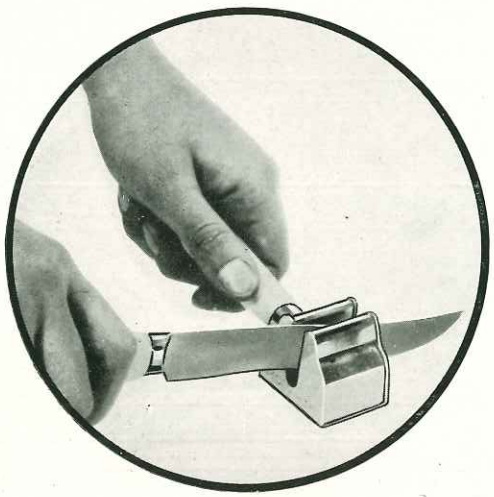
Length, 8½ inches.
Packed, 1 dozen to carton.
Weight, 2 lbs. 10 oz.



No. 301 Grapefruit Corer

The Type B Corer illustrated is the more popular style for household use. It quickly cores medium size grapefruit. It is finished in bright nickel-plate. The handles and blades are tightly riveted.

UTILITY KNIFE SHARPENER *made with butcher's steels*



No. 205

The metal frame of this model is brightly nickel-plated, while the handles are available lacquered in red, blue or green.

Length, 5½ inches.
Packed, ½ dozen to display carton.
Weight, 1 lb. 9 oz.
